DETAILED ACTION

Conclusion

This application is in condition for allowance except for the following formal matters:

- New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because:
 - In figure 2, number "310 or 350" should be corrected to indicate numbers -- 310 or 360 --. According to the specification, "container 350 is connected to an access tubing 360 that connects into the charging port 190, similar to access tubing 310 described above" (see page 11).

Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

- The disclosure is objected to because of the following informalities:

On page 7, line 13, the specification discloses that "[a]lternatively, electrical power for the apparatus is provided by a battery or photovoltaic source". However, the specification does not clarify whether the AC-DC converter is removed from the circuit since the alternate source of power supplies the apparatus with DC power. Appropriate correction and/or clarification is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
